Two of my favorite mods. If you have ever played Minecraft on PC, you probably know there are mods on the Internet that add a whole bunch of new ways for players to play the game. In my opinion, one of the best mods that any Minecraft player should download is Bedrock Edition or Bedrock Server . This mod adds an entire new world for players to play in (in Bedrock Edition). The creators of this mod did something pretty huge by bringing something different to Minecraft. Most of the time when people play Minecraft PC, they are playing on a server that has only ONE map. This is called "vanilla Minecraft." When you play on a server like this, your characters have to be transported to the location where your server is located. It's kind of boring

because all your friends are far away from your character and its frustrating when you want to progress in the game but you can't because your friends are not at that location, but with Bedrock Edition, you can have a whole new experience playing Minecraft. You don't need to be at special locations (like the spawn point) in order to play your favorite modded game on Bedrock Server.",
