Rust is primarily played on Slither.io, an online multiplayer server based in Germany with the majority of servers based in North America. Rust has been praised as being "pure fun" and "a breath of fresh air", while criticism included the poor graphics compared to other survival games such as "Minecraft". Due to its ability to be played on servers without custom content, it is also much less popular than Minecraft due to better compatibility of graphics with other graphical engines. On January 7th 2021, Steam announced that "Rust" had officially passed 10 million sales, and by August 2021, the game had sold over 3.5 million copies alone on Steam. As of April 20th 2021, "Rust" has sold over 5 million copies across all platforms including Steam.",

Minecraft Servers are great for those who want to play Minecraft with friends, as there is no limit on the number of players allowed and while there are limitations on the maximum number of villagers you can build, you can place practically anything. You will need a high-speed internet connection and a few more dedicated resources than your average computer user may have, so if you are running your server on a VPS or physical machine, it is recommended that you go with an account that offers reliable bandwidth with enough RAM and CPU to keep up with the demands of all players who are online at once.",

With the release of Minecraft Bedrock Edition, Mojang team also announced that they will support servers better than ever. That means that once you launch a server, no one can stop it unless you shut it down yourself. Before this update, if your Anti-Cheat software is not updated, or you don't have a firewall but still want to run a successful server, people can easily hack into your server and ruin everything. With the new updates coming soon to Bedrock Edition servers, this problem will be solved and everyone will be happy playing on their favorite servers.",

"Rust"s central gameplay is available in both singleplayer and multiplayer modes. When playing on a server with other players, combat is enabled and players must fight or flee from other hostile players who are also scavenging for resources. If a player is killed by another player they will not be able to respawn until they have been to a specified area of the map which acts as the game's 'spawn point'.",

On July 14th 2021, developers Facepunch Studios were forced to remove the games "furry" character models after the studio were sent a legal letter from the Australian High Court. Although this issue was later resolved in favor of Facepunch Studios, it highlighted the ongoing issues over intellectual property rights regarding cosmetic character items for online video games. The game has received mixed reviews. Rami Ismail, co-founder of indie game development blog Vlambeer, describes the gameplay of "Rust" as similar to a DayZ-style open world survival game, but says it is "a hundred times better in many ways". He stated that the biggest improvement is in how "Rust" handles players' mood. In DayZ and other games like it, he said that players are constantly forced to make decisions about how they want to spend their time: by killing zombies or by doing a little bit of both. In "Rust", players have a greater degree of control over their consumption of resources; Ismail said that the game's resource system allows players to scavenge for wood, metal and other supplies, allowing them to build items and take care of their daily needs without having to worry about starvation. This, he said, makes camping as a survival mechanic far less useful than it is in DayZ or "Minecraft".",
